WrxFlo

U.S. Go-To-Market Expansion Strategy

Final Strategic Presentation to Ivy Capital Partners

Ivy Capital Team: David Patton, Stephen Kelly, Henry Harbst and Cameron Crowell

WrxFlo CEO: Tim Crowe

UCD Team Members: Luke Owens, Yash Godbole, Ankit Mishra, Deepali Singh and Charley Reynolds

Prepared by: UCD Smurfit Student Consultants

23rd April 2026

Project Milestones | 5-Phase Engagement Roadmap

1 — Discovery & Alignment

Wks 1–4

COMPLETED

Validated Blended GTM Framework

- CEO deep-dive: Tim Crowe, Feb 23
- UK lessons extraction
- Ivy Capital kick-off
- GTM model validation

2 — Market Analysis & Targeting

Wks 5–8

COMPLETED

Competitor Battlecards · Geographic Ranking · Lead List

- U.S. vertical scoring (4 criteria)
- Geographic hub evaluation (TX/SC/OH)
- Competitive mapping vs Tulip & Sight Machine
- 20 enriched target accounts built

3 — Interim Framework

Wk 9

COMPLETED

Interim Strategic Framework

- Synthesis of Phases 1–2
- Stakeholder feedback loop
- This presentation to Ivy & Tim

4 — Commercial Modelling

Wks 10–11

COMPLETED

€10M ARR Bridge · Commercial Roadmap

- U.S. unit economics
- €10M ARR bridge model
- Dell co-sell SKU design
- Execution playbook

5 — Final Delivery

Wk 12 · Apr 23

FINAL

Final Board Presentation to Ivy & WrxFlo TODAY

- Board-ready presentation
- Series A positioning narrative
- Risk-mitigated GTM playbook

GTM Strategy | The Two-Engine Model for U.S. Scale

Tim Crowe (CEO Brief, Feb 2026): "We need velocity AND scale. Engine 1 builds the U.S. ARR density and case studies. Engine 2 delivers the enterprise deals that get us to Series A."

ENGINE 1 Velocity Mid-Market Direct

Target Segment	Manufacturers & Modular Contractors 50-500 employees
Deal Size	\$50k - \$250k ARR
Sales Cycle	4 - 9 months
Primary Vertical	Modular Construction → Blue Ocean
Geography	Texas Tier 1 | Southeast Corridor Tier 2
Motion	Direct outbound + BDR + events
Year 1 Target	15 logos · \$1.5M ARR
Budget	\$750k of \$1.5M U.S. GTM

WHY IT MATTERS

✓ Builds brand credibility fast case studies for Enterprise
✓ Shorter cycles = faster CAC payback (<9 months target)

ENGINE 2 Scale Dell Enterprise Channel

Target Segment	Enterprise Manufacturers & 3PLs \$1B+ Revenue
Deal Size	\$250k - \$1M+ ARR
Sales Cycle	9 - 18 months
Primary Vertical	Logistics / Warehousing → Red Ocean via Dell
Geography	Texas Tier 1 (Dell HQ) · Ohio Tier 3
Motion	Dell AE co-sell + SIP incentive model
Year 1 Target	4 logos · \$1.2M ARR
Budget	\$500k of \$1.5M U.S. GTM

WHY IT MATTERS

✓ Larger ACV one deal funds 3× Engine 1 deals
✓ Dell opens C-suite doors WrxFlo cannot open alone

GTM model validated with Tim Crowe, CEO Feb 23 2026 CEO Brief (Confidential). Budget allocations based on €1.5M U.S. expansion fund (of €3M pre-Series A raised).

Vertical Spearhead

Tim's 4-Criteria Framework · Top 3 Verticals · Lead Qualification Logic

1
Operational Fragmentation

Multi-site, multi-shift chaos with no standardised digital workflow

2
Labour Intensity

>100 FTEs in shop floor / warehouse operations

3
Under-Leveraged ERP

ERP exists but <30% utilised on the shop floor

4
Measurable ROI

Can quantify labour cost, downtime or throughput loss

Modular Construction ★★★★★

ENGINE 1 · BLUE OCEAN

- → Extreme fragmentation project-based chaos on factory floor
- → Large labour-intensive assembly teams (100–500 FTEs per plant)
- → ERP exists at HQ but never reaches the production line
- → Clear ROI: cycle time, rework rate, labour tracking
- → No SaaS competitor at World of Modular (MBI) 2026

Logistics & Warehousing ★★★★★

ENGINE 2 · RED OCEAN

- → Multi-site, multi-shift complexity across 3PL networks
- → Very high labour intensity pick/pack/dispatch operations
- → ERP present but WMS extensions partially fill the gap
- → Very clear ROI: throughput, error rates, cost per unit
- → Attack via Dell Enterprise Channel GXO, Ryder, Lineage

General Manufacturing ★★★★☆

SECONDARY WEDGE

- → High fragmentation job shop & batch complexity
- → High FTE count across production lines
- → Strong ERP presence with significant execution gaps
- → OEE, downtime, throughput are measurable
- → Enter via modular reference accounts as bridges

LEAD QUALIFICATION RULE: Disqualify any prospect missing ≥2 of Tim's 4 criteria · Hard Rule: Walk away from any deal requiring >4 weeks custom ERP integration

Vertical Spearhead | Evidence-Based Selection

Why Modular Construction · US Market · 4-Criteria Breakdown

1

Operational Fragmentation

"Construction process mostly fractured and low-tech… lacking real-time insights"
World Economic Forum, 2023

"Stakeholder misalignment drives inefficiency in modular projects"
Modular Building Institute / FMI, 2025

WHAT THIS MEANS FOR WRXFLO

Fragmented workflows + no real-time coordination layer = clear orchestration gap for WRXFLO

2

Labour Intensity

"92% of firms report difficulty hiring workers"
AGC, 2025

"Need for 499,000 new workers in 2026"
Deloitte, 2025

"41% of US construction workforce to retire by 2031"
McKinsey, 2020

WHAT THIS MEANS FOR WRXFLO

Labour constraint forces shift to automation + workflow optimisation

3

Under-Leveraged ERP

"Construction remains fractured and low-tech"
World Economic Forum, 2023

"True value comes from redesigning operations, not layering AI onto old workflows"
Deloitte, 2026

WHAT THIS MEANS FOR WRXFLO

ERP exists but does not orchestrate execution workflows → core gap WRXFLO fills

4

Measurable ROI

"20-50% faster project timelines; >20% cost savings at scale"
McKinsey, 2019

"Up to 40% reduction in manpower; up to 50% timeline acceleration"
McKinsey, 2025

WHAT THIS MEANS FOR WRXFLO

Clear ability to measure: cycle time, labour efficiency, throughput, rework

CONCLUSION: Modular construction is the only vertical that scores HIGH across all 4 criteria simultaneously · Market: $20.3B → $25.4B (2024-2029) MBI/FMI, 2025

Proof Point | Thurston Group

WrxFlo UK Deployment · Modular Manufacturer · Results directly transferable to U.S. Engine 1 sales conversations

−22%	−18%	+27%	−14%
Defect rates	Module cycle times	On-time delivery	Material waste

85%+ Production data captured digitally (from near zero)

1,000+ Annual admin hours saved

Days→Real-time Reporting lag eliminated

Platform: Deployed on existing SAP ERP. No custom integration required. Live in 8 weeks. Thurston Group, Bijur Delimon, and BBraun each demonstrate 30% reduction in operating costs and 40% increase in production capacity with equivalent headcount.

STRATEGIC SYNTHESIS →
McKinsey: Standardisation + Repeatability + Utilisation
Deloitte: Orchestrate workflows, redesign operations
AGC: Labour shortage + inability to hire AI talent → WRXFLO sits at the intersection of all three

Geographic Focus | The Fragmentation Imperative

Why geographic focus rather than geographic agnostic

Modular construction operators are structurally regional - the physical nature of the product caps any single operator's geographic reach. High property and management costs reinforce a fragmented Transportation and warehousing landscape (IBISWorld, 2026).

MARKET FORCES

1

Fragmented Customer Base

Mid-sized buyers dominate: school districts, local general contractors, regional developers, and state and local government agencies.

2

State-Specific Building Codes

Regulatory fragmentation is baked in - Florida hurricane-wind zones, California seismic standards, New York snow loads.

3

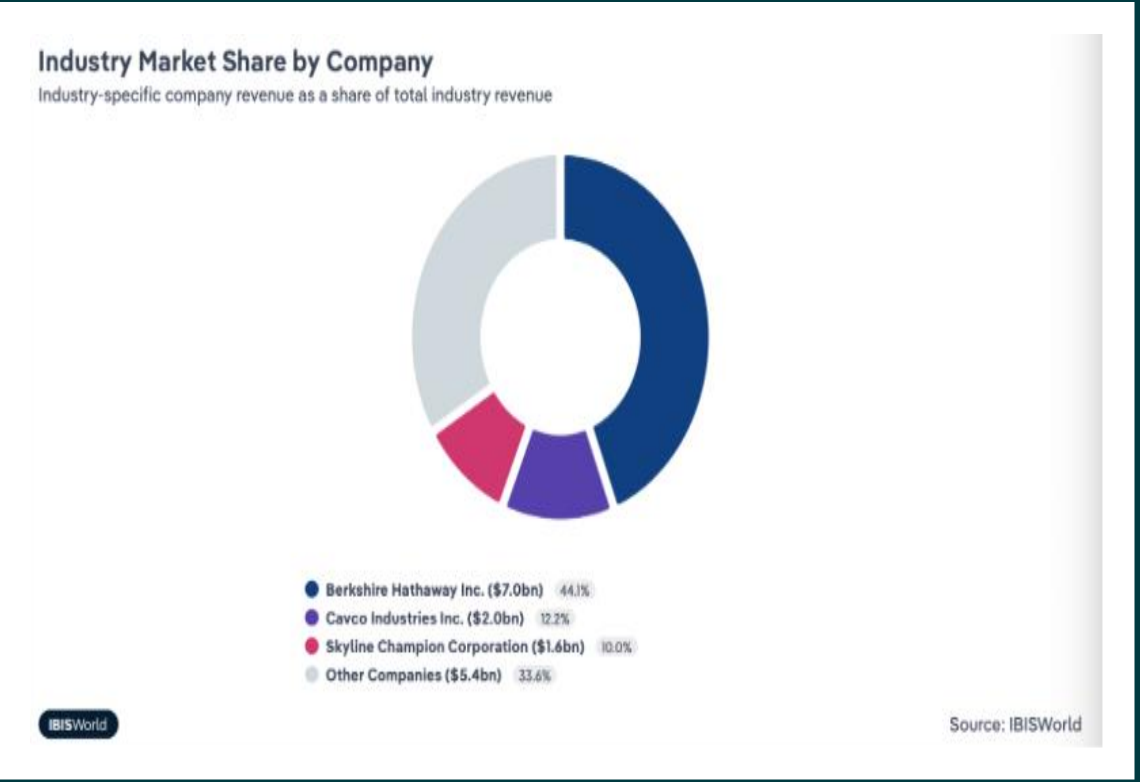
Transport Economics

Modules exceed the federal 8'6" width limit (14–16 ft). Permits, allowable travel hours, and escort requirements vary state by state.

Source: IBISWorld, 2026 · Transportation & Warehousing in the US; Prefabricated Home Manufacturing in the US

Geographic Focus | The US Modular Market

Market share does not equate to market reach



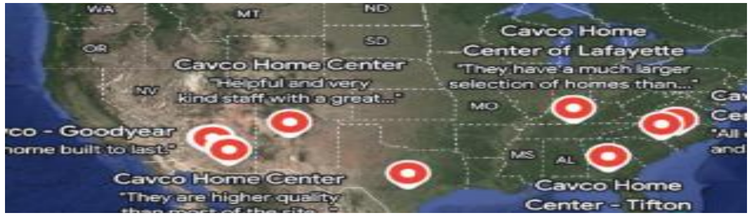
KEY INSIGHT

Three national brands - Clayton, Cavco and Champion - account for ~66% of revenue, yet each operates through regional networks. National share ≠ national coverage.

44.1%	12.2%	10.0%
Berkshire / Clayton	Cavco Industries	Skyline Champion

Champion Homes - regional clustering

Clayton Homes - corridor density



Cavco - distributed footprint

Source: IBISWorld, 2026 · Company 10-K filings · Regional plant-location data

Geographic Focus | The Strategic Implication

Density through geographic proximity - the proximity multiplier

VALIDATION · TIM CROWE, CEO

"If you get a reference in Georgia, the companies you approach next are most likely also in Georgia or adjacent states - not in California. When you get into one plant, you tend to be moving down the road to the adjacent state."

THREE COMPOUNDING EFFECTS TURN PROXIMITY INTO COMMERCIAL ADVANTAGE

01

Regional Reference Dynamics

Buyers operate regionally - so do their sources of trust. A reference from Charlotte is warm in Atlanta, but cold in San Francisco.

02

Shared Advisor Networks

Regional industry bodies, chambers of commerce, trade associations and sub-regional MBI chapters generate repeated exposure to the same buyers, advisors and referrers, compounding credibility with each touchpoint.

03

Travel & Coverage Economics

A BDR or founder-led sales motion can run multiple customer meetings per day within a regional corridor linked by two-hour drives or one-hour flights - sales productivity scales with density, not geography.

YEAR-ONE OBJECTIVE → concentration, not coverage - a tight cluster of reference accounts in adjacent states.

Regional Analysis | Weighted Scoring

PHM (×2) · T&W (×1) · Recommendation: Sun Belt

WEST

CA, AZ

PROS $7.5bn rev (37% of US activity) · 4.9% CAGR · CA ports = 31% of US trade

CONS California Island isolation · Data-centre demand divergence

NORTHEAST

PA, NY, NJ, MA, CT, RI

PROS Modular-receptive housing crisis · 4.7% CAGR · PA #1 state ($1.4bn)

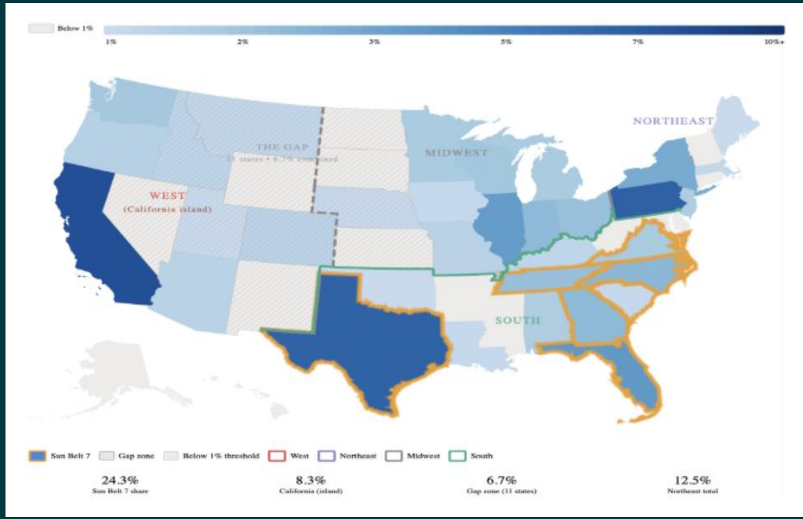
CONS Regulatory complexity · Lower account density and revenue

SUN BELT

TX, FL, GA, NC, SC, TN, VA - RECOMMENDED

PROS Modular hub (raw materials, low cost base, T&W infra) · Texas + Georgia logistics · Port of Savannah fastest-growing US East Coast container port · Strongest account density

OPERATIONAL Atlanta ~8h direct from Dublin vs ~11h to West Coast · Ireland shares ~5 working hours with US Eastern Time vs ~2 with Pacific



REGION	WEIGHTED
Sun Belt (TX, FL, GA, NC, VA, SC, TN)	**26**
Midwest (IL, OH, IN, MI, WI)	14
Northeast (PA, NY, NJ, MA, CT, RI)	8
West (CA, AZ)	8
Other (AL)	4

Geographic | Staged Lead Generation

Four-tier priority ordering · Sun Belt 7 as the beachhead corridor

FOUR-TIER PRIORITY ORDERING

PRIORITY 1
BEACHHEAD

TEXAS

Strongest state on every vertical metric. CEO-led Engine 1 + Engine 2 from one metro.

PRIORITY 2
GA · NC · SC · TN · FL · VA

SOUTHEAST CORRIDOR

Build density while Texas references mature. BDR-led parallel motion.

PRIORITY 3
LATER-STAGE

NORTHEAST

Reserved until regulatory and transport-permit complexity can be absorbed.

PRIORITY 4
SELECTIVE ONLY

WEST

Disqualified as beachhead. Dell-led Engine 2 exceptions only.

TEXAS · Beachhead

#2 Nationally in PHM estabs & revenue	**$4.2B** Texas warehousing revenue	**20 min** Dell HQ ↔ EI Austin office

LEAD PROSPECTS

→ Aries Building Systems (Houston) - Reliant Asset Mgmt; TX/LA/CO/FL/GA/NM/OK footprint

→ Boxx Modular (Fort Worth) - Black Diamond Group (TSX: BDI); public-parent balance sheet

SOUTHEAST CORRIDOR · Parallel Build

NC 42 PHM estabs	**TN 41** PHM estabs	**GA 36** PHM estabs	**SC 12** PHM estabs

PRIORITY LEADS

→ Affinity Building Systems (GA) · Southeast Modular (FL) · Quartz Modular (NC)

→ K-Con (SC) · Palomar Modular & Ramtech (TX, corridor-active) · Affordable Structures (FL)

ENGINE 1 → fragmented "other companies" segment · 33.6% of PHM revenue outside top-3 · Thurston UK deployment as reference template | ENGINE 2 → enterprise accounts via Dell

Sun Belt 7 = Texas + Florida, Georgia, Tennessee, South Carolina, North Carolina, Virginia · IBISWorld 2026 · MBI 2025

Geographic | Staged Lead Generation

The bridge to Champion & Clayton · Region-to-revenue summary

ENGINE 2 · THE BRIDGE TO CHAMPION & CLAYTON

NEAR-TERM TARGET · Champion Homes (NYSE: SKY)

→ #3 US PHM · 10.0% share · ~$1.6bn revenue · 36 plants

→ Concrete interest already expressed

→ Titan Factory Direct southern footprint anchors to Sun Belt density

STRATEGIC WHALE · Clayton Homes (Berkshire Hathaway)

→ 44.1% US PHM share · $7.0bn revenue · HQ Maryville, TN - inside the corridor

→ Not a cold target - the account Engine 1 is designed to attract

→ Year-1 outbound without reference density will fail

→ Year-2 with 6–7 mid-market peers on Thurston-range ROI = materially credible

ADDITIONAL ENGINE 2 TARGETS (VIA DELL)

WillScot · Cavco · GXO · Ryder · Lineage

SUMMARY · FROM REGION TO REVENUE

01 FRAGMENTATION
U.S. modular & logistics industries are structurally fragmented

02 PROXIMITY
Density through proximity is the most viable sales motion

03 SOUTHEAST
Primary region where target verticals co-locate at sufficient density

04 TWO ENGINES
Engine 1 builds short-term reference density · Engine 2 opens medium-term enterprise channels

RECURSIVE ARGUMENT → fragmentation → proximity → Southeast → two engines

Sun Belt 7 = TX + FL, GA, TN, SC, NC, VA · IBISWorld 2026 · MBI 2025 · Thurston Group UK reference: £250,000 deploymentled by Dan Pollard (Production Director)

Competitive Analysis

SWOT Analysis

S — Strengths

- **Unified Full-Stack Platform**: Only mid-market system covering IoT, MES, logistics, and ERP orchestration in one.
- **Rapid ROI**: Deploys in weeks with a 3-5 months break-even period and a 98% retention rate.
- **Domain Authority**: Founding team possesses rare industry expertise from their Dell pedigree.

W — Weaknesses

- **Zero US Presence**: No brand recognition or reference clients currently in the US market.
- **AI Product Gap**: Advanced AI capabilities are still 18-24 months away from deployment.
- **Resource Constraints**: No dedicated US sales team and potential scaling issues beyond 15 clients.

O — Opportunities

- **Untapped Mid-Market**: A $1.5 billion US SOM currently ignored by major enterprise vendors.
- **Modular Blue Ocean**: No SaaS competitors currently present in the modular construction vertical.
- **Dell Partnership**: Potential to operationalise the Dell relationship to access large enterprise accounts.

T — Threats

- **Competitive Rivalry**: Well-funded competitors are expanding and enterprise giants may move down-market.
- **Regulatory Complexity**: US-specific compliance requirements add layers of deployment difficulty.
- **Customisation Trap**: Risk of single complex deals consuming excessive engineering resources.

Value Chain Analysis

Activity	WrxFlo	Tulip	Sight Machine

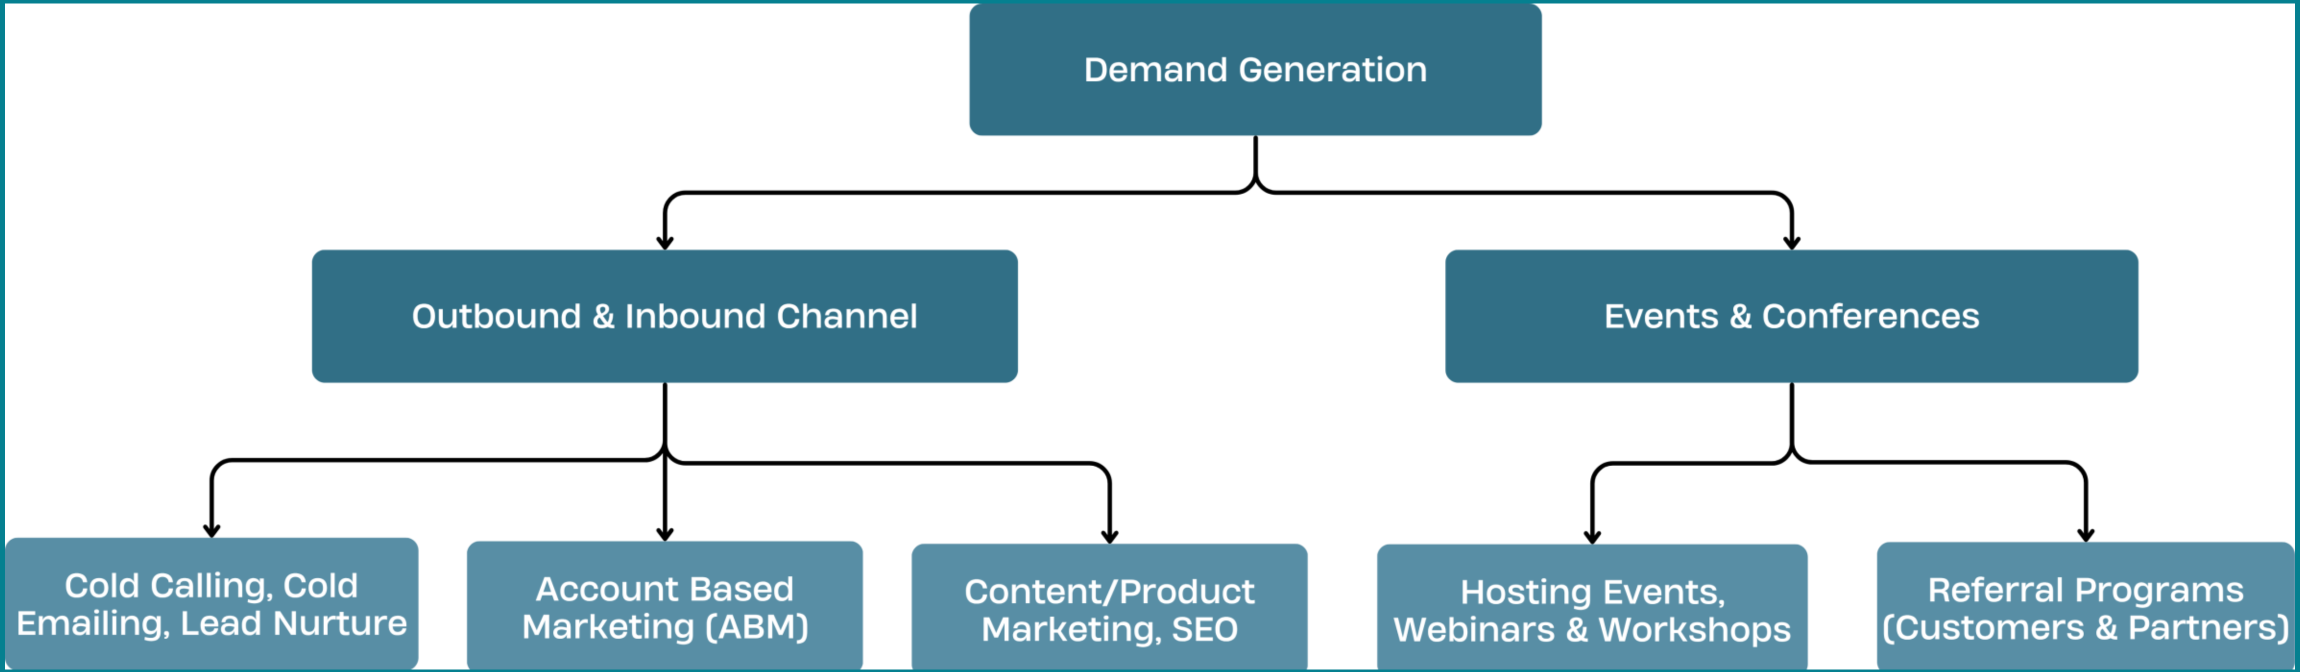
Demand Generation



Demand Generation is very vast, the above is a rough depiction to highlight Lead Generation & Events & Conferences.

Events & Conferences

Where Competitors Are, WrxFlo Must Be!

Tulip is confirmed at 3 events in 2026. Sight Machine exhibits at 2. WrxFlo has zero U.S. brand. Counter-exhibiting where competitors show up is the fastest credibility lever.

DELL HOSTED — **$25k**

Dell Technologies World

May 18–21 · Las Vegas, NV

Exhibit as Dell ISV Partner. #1 priority non-negotiable.

Competitors: Dell ISV ecosystem

TULIP + SIGHT MACHINE — **$20k**

MODEX

Apr 13-16 Atlanta,GA

Counter-exhibit. 50,000+ logistics buyers on the floor.

Competitors: Tulip, Sight Machine

BLUE OCEAN — **$15k**

World of Modular (MBI)

Apr 20–23 · Las Vegas, NV

Sole SaaS vendor. Exhibit + submit speaking abstract.

Competitors: No SaaS competitors

C-SUITE ONLY — **$15k**

American Mfg Summit

Mar 2026 · Chicago, IL

Sponsor for 1-on-1 pre-arranged buyer meetings.

Competitors: Tulip present

TULIP BOOTH 628 — **$10k**

Defense Mfg Conference

Mar 17–20 · Orlando, FL

Counter-exhibit directly against Tulip.

Competitors: Tulip confirmed: Booth 628

TULIP BOOTH 1941 — **$3k**

NVIDIA GTC 2026

Mar 16–19 · San Jose, CA

Attend as delegate only. Intelligence gathering.

Competitors: Tulip confirmed: Booth 1941

ESTIMATED 2026 EVENTS BUDGET: ~$93,000

~6% of U.S. GTM budget in line with industry benchmarks of 5–8% for market-entry phase

Dell Tech World $25k	MODEX $20k	World of Modular $15k	AMS $15k	Remaining events $18k

Competitive Positioning | U.S. Buyer Objections & WrxFlo Responses

IVY | WRXFLO | UCD DUBLIN

These are the five sample objections WrxFlo WILL face in every U.S. sales conversation. Each has a proven counter but only if the sales rep is prepared. Full battlecards vs. Tulip, Sight Machine & Legacy MES available in the Excel Workbook (Tab Competitive Analysis).

Priority	Objection	WrxFlo Response	Asset Needed
CRITICAL	**"We don't have the budget right now."** *Why: Capital constraint or fiscal year timing.*	Reframe as OpEx not CapEx. Calculate cost of inaction: 'Your current downtime costs you $X per month. WrxFlo's entry is $Y. You ROI in Z months.' Build a cost-of-inaction calculator per account before the call.	*Cost-of-inaction calculator per target account.*
CRITICAL	**"Can WrxFlo integrate with our custom ERP?"** *Why: Fear of implementation complexity with bespoke legacy systems.*	Be honest. If the ERP is undocumented and requires >4 weeks of custom work disqualify. This is Anti-Strategy Rule #1 from the UK playbook. Have a clear integration scope document ready.	*Integration scope document + T&M policy for custom work.*
HIGH	**"We already use Tulip / Sight Machine."** *Why: Existing investment creates switching cost inertia.*	Acknowledge their investment. Show the ERP execution gap their current tool leaves open. Offer a 30-day pilot on one production line to prove the ROI delta head-to-head.	*Side-by-side ROI comparison WrxFlo overlay on existing tool.*
HIGH	**"You have no U.S. customers."** *Why: U.S. buyers are risk-averse. No local social proof.*	Lead with UK Lighthouse accounts as proof. Offer a risk-reducing paid POC structure with fixed scope and clear success metrics. Position Dell partnership as the credibility anchor.	*UK customer video testimonials + ROI case studies for U.S. conversations.*
MEDIUM	**"Is Dell selling this or is WrxFlo?"** *Why: Confusion about who owns the relationship and accountability.*	Be clear: WrxFlo owns the software relationship and customer success. Dell provides the infrastructure layer. Offer a direct WrxFlo contract with Dell as a named infrastructure partner in the SOW.	*Joint solution brief with defined RACI (WrxFlo / Dell / Customer).*

Objections sourced from Tim Crowe CEO Brief (Feb 2026) + desk research on U.S. manufacturing SaaS buying patterns. Full battlecards available in excel sheet tab Competitive Analysis.

U.S. Team Structure | Indicative

€10M ARR BRIDGE: €3.5M Base + €4.0M Existing Client Expansion + €2.5M U.S. Net-New (18 months)

WHAT WRXFLO NEEDS TO BUILD IN THE U.S. AND WHY

🤝 BOOTS ON THE GROUND

Field Sales Team Engine 1 Velocity

VP Sales (U.S.)

📍 Austin, TX 💵 $180–220k base + equity

Owns Engine 1 and Engine 2 pipeline. Hires in Dell backyard. Critical Day 1 hire.

Account Executive ×2

📍 Austin TX + Greenville SC 💵 $120–150k OTE

One per Tier 1 hub. Engine 1 mid-market direct. Target: 8 logos each in Year 1.

Solutions Engineer ×1

📍 Remote (U.S.) 💵 $130–160k

Supports AEs on discovery and demo. Prevents over-customisation trap.

Insight: VP Sales in Austin is the most important first hire. Dell AE relationships are built on proximity. Source: SaaS GTM Benchmarks OpenView 2025

🔔 DEMAND GENERATION

Pipeline Engine Brand & Inbound

BDR Lead ×1

📍 South Carolina hub 💵 $70–90k OTE

SC = lowest OpEx base. Targets Engine 1 modular accounts. Feeds AE pipeline.

Events & Partnerships Mgr

📍 Remote / travel 💵 $80–100k

Owns the $93k events budget. Counter-exhibit at Tulip events. MBI relationship.

Content / Demand Gen

📍 Remote 💵 $75–95k

Builds U.S. case studies from UK proof points. Feeds SEO and outbound sequences.

Insight: Companies that invest in Demand Gen in market-entry year see 2.3× faster pipeline build vs. outbound-only. Source: Forrester B2B Demand Gen Survey 2024

Team structure & compensation: OpenView SaaS GTM Benchmarks 2025 · Forrester B2B Demand Gen Survey 2024 · SaaStr Enterprise Sales Playbook 2025 · Glassdoor U.S. SaaS AE salary data (Austin TX, Charleston SC, Mar 2026)

Hardware Ecosystem | A Segmented Partner Model

Partner Summary Matrix - GTM Engine Mapping & Conflict Assessment

"There is nothing we can't connect to." -Tim Crowe, CEO, March 2026

Hardware Partner	GTM Engine	Commercial Role	Key Value To WrxFlo	Conflict Risk
TDK SensEI	**Engine 1 Primary**	Machine sensor data; brownfield legacy connectivity. edgeRX sensors: vibration, temperature, machine state.	Warm intros to mid-market accounts; zero-disruption deployment story. No software overlap.	**NONE**
Dell Technologies	**Engine 2 Enterprise Only**	Edge compute for large global deployments; co-sell motion via Dell AE teams.	Access to Fortune 500 enterprise accounts; Dell brand credibility anchor.	**NONE**
HPE Edgeline	**Engine 2 Alternative**	IT/OT convergence at factory edge; broader channel partner network. OT Link Platform.	Extended reach into enterprise manufacturers not covered by Dell account teams.	**NONE**
Zebra Technologies	**DO NOT PURSUE**	**CONFLICT IDENTIFIED**	N/A	**CONFLICT - Confirmed Tulip partner (Oct 2025). Remove from all consideration.**

TDK SensEI - Engine 1 Mid-Market

'Zero-disruption' approach ingests data from legacy machines invisible to an ERP. TDK provides raw sensor data and WrxFlo contextualises it against active ERP jobs.

Dell Technologies - Engine 2 Enterprise

Edge Gateways provide compute for real-time data contextualisation at the factory edge. Big-name credibility opens Fortune 500 accounts.

HPE Edgeline - Engine 2 Alternative

Commercially equivalent to Dell. Broad reseller network provides additional route into enterprise accounts outside Dell's team structure.

Source: Tim Crowe In-Person Meeting, March 2026 · HPE (2025)

Service Partner Strategy | Gap vs. Conflict Analysis

⚠ *Tim Crowe's filter: "Do they already have what we provide? If they do, there is no point. If they don't have a factory floor execution solution, there is a gap - and that is our opportunity." - Tim Crowe, March 2026*

Service Partner	Their Manufacturing Capability	GAP or CONFLICT?	What's In It For Them	Approach
Hitachi Solutions (Dallas TX - D365 Gold SI)	Dynamics 365 manufacturing SI. Own MES targets Japanese-model mfg - not U.S. mid-market modular. No Engine 1 execution product.	✅ GAP	Services margin (15–20% referral). Extends D365 manufacturing practice. Improves client NPS on manufacturing projects.	Approach via Microsoft Alliance channel. Lead with D365 client base overlap. Propose co-delivery pilot on one Engine 1 account.
NTT DATA (Irving TX - SAP Platinum)	Advisory and SI only - no proprietary execution software. Recommends and implements third-party products. SAP S/4HANA clients need WrxFlo's execution layer.	✅ GAP	Services margin (30% of deal). New revenue on existing SAP client base. Differentiates Digital Manufacturing practice vs Big 4.	Approach Digital Manufacturing Practice Lead in Irving TX. Lead with 70/30 SaaS/services split. Focus on SAP accounts with shop floor execution gap.
Avanade (Accenture × Microsoft)	Has built CUSTOM Power Platform workflow tools for some mfg clients. These bespoke builds are the over-customisation pattern WrxFlo avoids.	⚠️ PARTIAL CONFLICT	WrxFlo's pre-built connectors = faster than custom Power Platform builds. Reduces Avanade implementation risk. Referral revenue.	Position as distribution channel NOT deployment partner. WrxFlo as standardised alternative to custom builds. Ensure WrxFlo retains software IP and customer relationship.

COMMERCIAL MODEL: WrxFlo retains 100% SaaS ARR. Tier A (Hitachi, NTT DATA): 15–20% referral fee + 70–85% services margin for partner. Tier B (Avanade): referral fee only.

NEW HARDWARE PARTNER - HPE Edgeline: Validated by Tim Crowe as a Dell-equivalent for Engine 2 enterprise infrastructure. HPE Edgeline = IT/OT convergence at factory edge, open platform, SAP/Microsoft/AWS compatible. **TDK SensEI = Engine 1 mid-market primary (machine sensor data, brownfield connectivity). Dell + HPE = Engine 2 enterprise compute infrastructure only.**

Gap/Conflict assessment source: Tim Crowe (In-Person Meeting, March 2026) · ERP Research 2026 · MSDynamicsWorld Top 11 U.S. SIs 2026 · SAP Partner Finder · Microsoft Partner Network

Dell Partner Activation

Making Dell AEs WANT to Sell WrxFlo - Engine 2 Activation Playbook

ENGINE 2 ENTERPRISE ONLY - TDK SensEI handles Engine 1 mid-market · Dell / HPE Edgeline activate Engine 2 large enterprise accounts

Tim Crowe (CEO Brief, Feb 2026): *"Dell can open doors but does not automatically close software deals. The partnership must be operationalised - not assumed."*

1

PILLAR 1

Dell Partner Portal

Register WrxFlo in Dell's ISV Partner Portal. Create 'Smart Factory Edge Bundle' solution page. Without this, 10,000+ Dell AEs cannot propose WrxFlo.

2

PILLAR 2

SIP Revenue Model

Negotiate a Solution Incentive Programme: \$2k–\$5k cash per deal + hardware quota retirement. Every WrxFlo deal with a Dell Edge Gateway retires the AE's quota. The AE's self-interest is served. Co-sell SKU: 'Smart Factory Edge Bundle.'

3

PILLAR 3

Stalled Account Recovery

Target Dell's at-risk manufacturing accounts. AE re-entry script: 'Your client has Dell Edge Gateways idle - WrxFlo activates them in 8 weeks and delivers measurable ROI.' Every WrxFlo deployment = new Dell hardware expansion.

Key Risks & Anti-Strategy Guardrails | Lessons from the UK Playbook

IVY | WRXFLO | UCD DUBLIN

01 Dell Channel Illusion

HIGH | CRITICAL

Dell's 10,000+ AEs are hardware sellers. Assuming the partnership generates software pipeline without operational activation is the #1 Engine 2 failure mode.

✅ **GUARDRAIL:** Build the 3-pillar activation model (ISV → SIP → Red Accounts) before Q3 2026.

02 Capital Runway Pressure

MEDIUM | HIGH

€1.5M evaporates fast in U.S. sales. If CAC payback exceeds 9 months, WrxFlo enters Series A conversations without proof of unit economics.

✅ **GUARDRAIL:** Prioritise Engine 1 (shorter cycles). Monitor CAC monthly. Walk away from slow deals.

03 Limited U.S. Brand Recognition

HIGH | HIGH

Limited U.S. logos today. Enterprise buyers will ask: 'Who else in the U.S. uses this?' Without a credible answer, deals stall at Stage 2.

✅ **GUARDRAIL:** Lead with UK Lighthouse accounts. Offer paid POC with fixed scope. Dell brand = interim credibility.

04 Over-Customisation Trap

MEDIUM | HIGH

Tim's #1 UK lesson. A single 'strategic' deal requiring 8 weeks of custom integration consumes a Solutions Engineer for an entire quarter.

✅ **GUARDRAIL:** Hard rule no exceptions: walk away from any deal requiring >4 weeks custom ERP integration.

05 Series A Timing Risk

MEDIUM | CRITICAL

U.S. traction must be demonstrable by Q3 2027. A missed milestone doesn't just slow fundraising it resets the entire Series A narrative.

✅ **GUARDRAIL:** Set hard KPI gates at Week 12. Protect UK/IE client base. Do not sacrifice existing ARR for U.S. expansion bets.

Guardrails derived from: Tim Crowe CEO Brief (Feb 2026) · UK implementation post-mortem · Anti-Strategy framework co-developed with Ivy Capital Partners

Strategic Conclusions | Cross-Section Synthesis

#	Strategic Conclusion	Evidence Anchor
1	**Modular construction is a genuine Blue Ocean.** Enter it first, before any competitor recognises it.	No SaaS competitor exhibited at MBI World of Modular 2026. $20.3B market. 4.5% CAGR. WrxFlo's platform was built for this environment.
2	**Southeast corridor is the right geography for Engine 1.** Build density; do not spread thin.	64,820 combined modular + logistics establishments; Texas Tier 1 (Dell HQ proximity). Southeast Tier 2.
3	**The VP Sales hire in Austin, Texas is the most important single decision WrxFlo makes in H1 2026.**	Austin proximity to Dell Round Rock HQ. Engine 1 and Engine 2 require a credible operator to run both motions from the same city.
4	**The Dell partnership must be operationalised.** ISV registration, SIP, and Red Account Recovery must be built before DTW in May 2027.	Dell Channel Illusion is the highest-severity risk in the strategy. Partnership agreements generate zero pipeline without structural activation.
5	**Thurston Group is WrxFlo's commercial currency in every Engine 1 conversation.** Lead with the metrics.	−22% defects, −18% cycle times, +27% on-time delivery. 1,000+ annual admin hours saved. These are the proof points that close deals.
6	**Walk away from custom integrations. No exception.** The four-week rule is the cultural guardrail that protects the entire strategy.	*Tim Crowe: "a deal that requires more than four weeks of custom ERP integration is not a deal. It is a distraction." UK market entry validation.*
7	**Champion Homes is the primary Engine 2 modular target.** The prior conversation must be re-activated. One plant → adjacent plant → corridor.	*Prior WrxFlo–Champion Homes conversation confirmed. Tim Crowe: "When you get into one plant, you tend to move down the road to the adjacent state."*
